

GLOBAL WARMING RALLY!!!!

Protest PEABODY's Global Warming pollution!

Peabody Energy is the world's largest coal company – and largest enabler of global warming pollution. Peabody is proposing massive coal-fired power plants and liquid coal facilities throughout the Midwest that will accelerate global warming. Just three of Peabody's projects would emit as much global warming pollution as seven NE states are proposing to eliminate from all of their power plants.

At a time when the world is trying to reduce global warming pollutions, Peabody is forging forward with the largest new sources of global warming emissions seen in this country for 20 years. If we are going to stop global warming, we have to stop BIG COAL.

Join us in voicing your opposition to Peabody's plans to increase global warming pollution.

November 17, 2007

1:00pm - Kiener Park

Across from Peabody Headquarters

700 Market St.

Downtown St. Louis

Interested in attending? Transportation may be available from your area.
