

**Pack your lunch for a brown-bag forum on old coal,
public health, and the State Capitol coal plant!**

**Forum on Old Coal and New Energy
Tuesday, September 29th
Noon-1:00pm**

**Dove Center, Prairie Heart Institute
St. John's Hospital, 619 E. Mason Street**

This event is one of dozens being held nationwide by the Sierra Club to fight special clean up exemptions for coal. We'll highlight the impacts of aging coal plants nationally and the State Capitol coal plant that's a few blocks away from Springfield's downtown medical district.

Speakers include

Dennis Ruez Jr., Environmental Studies Department Chair, UIS
The national problem of old coal and global warming

Dr. Stuart Frank, Physicians for Social Responsibility
Public health impacts of aging coal plants

Will Reynolds, Illinois Sierra Club, Vice-Chair
Proposed federal regulations and the State Capitol coal plant

You can take action at the forum by adding your picture to a national photo petition to the EPA asking for strong regulations of global warming and old coal. For more information about EPA petition, visit www.sierraclub.org/bigpicture.
